BIOGRAPHY

Bodhi Del Mar (b. 1983, AU) is a visual artist based from her mountainside home studio on the Gold Coast, Australia.

After studying commercial photography and working in the industry for 10 years, Bodhi deep dived into a creative cocoon and relaunched as an independent artist in 2014.

With photography as her springboard she continues to experiment with a wide range of media to develop her own unique arts practice; including composite photography, cold glass, vinyl, stenciling and painting. (both on canvas and humans).

Her whimsical and metaphorical artworks often speak to both her outer and inner world experiences, using colour and recurring symbols to represent the human psyche.

She is currently working on a number of surreal limited edition giclée print series from her travels to Africa, Antarctica & India and continues to experiment with a wide range of mediums in her original artworks.

ARTIST STATEMENT

As I explore the outer, so I explore the inner. I'm deeply compelled to examine our connection to the natural world and how this parallels the connection we have to our highest self.

I'm drawn to psychology, symbolism and the journey of the human soul, often using recurring metaphors to tap into and shine a light into the deep subconscious. Each dream-like scene is intended to thoroughly delight and amplify a childlike curiosity and spirit - to hopefully inspire a more mindful heart and heartened mind.
